

Complete the **Student** class so that the **main** method prints the following:

```
Name of the Student: Bob
ID of the Student: 1
Name of the Student: Tom
ID of the Student: 2
Name of the Student: Jack
ID of the Student: 3
Name of the Student: Jill
ID of the Student: 4
```

```
public class Student{
    //Your code here
}
```

```
public class Printer{
    public void printDetail(Student s){
        System.out.println("Name of the Student: "+s.name);
        System.out.println("ID of the Student: "+s.id);
    }
}
```

```
public class Test{
    public static void main(String [] args){
        Student s1 = new Student("Bob", 1);
        Student s2 = new Student("Tom", 2);
        Student s3 = new Student("Jack", 3);
        Student s4 = new Student("Jill", 4);
        Printer pr = new Printer();
        pr.printDetail(s1);
        pr.printDetail(s2);
        pr.printDetail(s3);
        pr.printDetail(s4);
    }
}
```
